Montmorency County Road Commission Accessibility Statement

This is the official accessibility statement from the Montmorency County Road Commission. For official records, you may also retain a copy of this policy by referencing the file "MCRC Accessibility Statement.docx".

| Our Commitment to Accessibility

The Montmorency County Road Commission takes specific measures to ensure the accessibility of our website. To support equitable access, we include accessibility as part of our mission statement and throughout our internal policies. We actively maintain our digital presence by:

- Regularly reviewing and updating our website to improve accessibility.
- Providing alternative text for images, captions for videos, and accessible navigation.
- Testing our website using automated tools and user feedback to identify and resolve accessibility issues.

| Current Conformance Status

The Web Content Accessibility Guidelines (WCAG) define requirements for designers and developers to improve accessibility for people with disabilities, utilizing three levels of conformance: Level A, Level AA, and Level AAA. The Montmorency County Road Commission website is partially conformant with WCAG 2.1 Level AA, meaning some parts of the content do not fully conform to the accessibility standard. We are actively working to address the areas that do not yet meet these standards. To achieve this, our website's accessibility relies on HTML to function correctly in combination with your web browser and any assistive technologies or plugins installed on your computer.

| Known Limitations and Alternatives

Despite our best efforts to ensure website accessibility, there may be some known limitations.

- Some older PDF documents are currently in storage and may not be immediately available online.
- If you require these files, we will search for and provide the requested documentation, typically within 5 business days.

| Assessment Approach

The Montmorency County Road Commission assessed the accessibility of our website through a self-evaluation using the website software W3C Accessibility review tool.
